

## Using A FolderBrowserDialog

```
MyFormat = "*.*"  
    FolderBrowserDialog1.SelectedPath = TextBox2.Text.Trim'This line is a option  
    FolderBrowserDialog1.ShowDialog()  
    MyDur2 = FolderBrowserDialog1.SelectedPath  
    FolderBrowserDialog1.Reset()  
    LoadOne()
```

### 'Second Type

*'This opens the folderDialog Box to C Drive*

```
FolderBrowserDialog1.SelectedPath = "C:\"  
    FolderBrowserDialog1.ShowDialog()  
    MyFolder = FolderBrowserDialog1.SelectedPath
```

## Safest One : *Prevents thying to load all of C:\*

```
Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click  
    FolderBrowserDialog1.SelectedPath = "C:\"  
    FolderBrowserDialog1.ShowDialog()  
    MyListPath = FolderBrowserDialog1.SelectedPath  
    If MyListPath = "C:\" Then  
        ShortError()  
        Exit Sub  
    ElseIf MyListPath = "c:\" Then  
        ShortError()  
        Exit Sub  
    End If  
  
    LoadOne()  
  
End Sub
```
