Liter to Gallons

```vbnet
Public Class ??Whatever??

    Dim MyNum As Integer = 0
    Dim Holder As Integer = 0
    Dim SecondHolder As Integer = 0
    Dim ThirdHolder As Integer = 0

    'MaskedTextBox1.Text is the input for the formulars

    MyNum = MaskedTextBox1.Text
        SumLabel.Text = MyNum / 3.785 & " Gal."
```
