

Fill a list of all Char by number

'Place two list boxes names (ResultsList) and (SourceList) and Textbox1.. on a form

```
Private Sub btnAdd1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles btnAdd1.Click
    'Dim MyChar As Char
    Dim MyNum As Integer
    MyNum = 0
    Do Until MyNum = 255
        ResultsList.Items.Add(Chr(MyNum))
        sourceList.Items.Add("Chr" & " ( " & (MyNum) & " )")
        MyNum = MyNum + 1
    Loop

End Sub

Private Sub sourceList_SelectedIndexChanged(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles sourceList.SelectedIndexChanged
    ResultsList.SelectedIndex = sourceList.SelectedIndex
    TextBox1.Text = sourceList.SelectedItem & " = " & ResultsList.SelectedItem
End Sub

Private Sub ResultsList_SelectedIndexChanged(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles ResultsList.SelectedIndexChanged
    sourceList.SelectedIndex = ResultsList.SelectedIndex
    TextBox1.Text = sourceList.SelectedItem & " = " & ResultsList.SelectedItem
End Sub
```
