

## Close All Forms

```
Private Sub CloseAllForms()  
    Dim frm As Form  
    'First we want to loop through all the  
    'Forms and close them (We close the current Form last)  
  
    For Each frm In Forms  
        'Make sure we arent looking at the current Form  
  
        If frm.hWnd <> Me.hWnd Then  
            'Unload this Form  
  
            Unload frm  
            frm = Nothing  
  
        End If  
        'Now get the next Form  
  
    Next frm  
  
    'Now unload the current Form  
    Unload Me  
  
End Sub
```
