

Using multi RichText boxes

' Dim WhoHas as public IE Public Dim WhoHas as String in the activated event of the forms place WhoHas = (the 'form name) change form name to match and Richtextbox name to match your needs

'in the example below the forms were named First, Second, Third, Formulars, each having a RichTextBox1

```
If WhoHas = "Frist" Then
    Frist.RichTextBox1.SelectedText = " " & Label1.Text & " "
Elseif WhoHas = "Second" Then
    Second.RichTextBox1.SelectedText = " " & Label1.Text & " "
Elseif WhoHas = "Third" Then
    Third.ThirdRichTextBox1.SelectedText = " " & Label1.Text & " "
Elseif WhoHas = "Formulars" Then
    Formulars.RichTextBox1.SelectedText = " " & Label1.Text & " "
End If
```
