

MS Access Form Spell Check

Description: All you will need to is add this code to the "After Update Event" of the text box you want to have spell check run on. You will also need to change the txtBoxName to whatever your text box is named. Need to add spell checking to your forms?

```
Private Sub txtBoxName_AfterUpDate()  
If Len(Me! txtBoxName & "") > 0 Then  
DoCmd.RunCommand asCmdSpelling  
Else  
Exit Sub  
End Sub
```
