

Open a Text file

'Source Folder is the folder the file is in ...and ListBoxThree has the name of the file,

may call this procedure say from a list double click event

```
Private Sub ReadFile()
```

```
    Dim ToView As String
```

```
    ToView = CurDir()
```

```
    Dim fileReader As String
```

```
    fileReader = My.Computer.FileSystem.ReadAllText(ToView &  
"\Source Folder\" & ListBoxThree.Text & ".TXT")
```

```
    TextBox1.Text = fileReader
```

```
End Sub
```
