

## String.Concat() VB NET

```
Private Sub Button1_Click(ByVal sender As System.Object, _  
    ByVal e As System.EventArgs) Handles Button1.Click
```

```
    Dim str1 As String  
    Dim str2 As String
```

```
    str1 = "Concat() "  
    str2 = "Test"  
    MsgBox(String.Concat(str1, str2))
```

```
End Sub
```

'When you run this source code you will get "Concat() Test " in message box.
