

Move File With FolderBrowser

```
FolderBrowserDialog1.SelectedPath = "c:\"
FolderBrowserDialog1.ShowDialog()
destinationFileName = FolderBrowserDialog1.SelectedPath & "\" &
ListView.FocusedItem.Text
Try
    If System.IO.File.Exists(sourceFileName) = True Then

        System.IO.File.Move(sourceFileName, destinationFileName)
        MessageBox.Show("File Moved")

    End If
Catch ex As Exception
    ErrorMess()
End Try
```
