

Using a target blank new tab window

```
<html>  
<body>
```

```
<a href="http://www.w3schools.com/html/" target="_blank">Visit our HTML tutorial!</a>
```

```
<p>If you set the target attribute to "_blank", the link will open in a new browser window or tab.</p>
```

```
</body>  
</html>
```

Produces

[Visit our HTML tutorial!](http://www.w3schools.com/html/)

If you set the target attribute to " blank", the link will open in a new browser window or tab.
