

Save the contents and reload of a combobox

```
' These three function will take all the listings out of a combobox save the to a file in
the sub directory Settings
'then reload them each time the form loads. call the Phrase() function frist then
the SavePhrase Function
'From the form's closing event. call the upLoadPhrase() function from the form's load
event
'Form needs a combobox named ( PhraseComboBox ) Labels named (CountLabel6 and
CountLabel7 )
' A ( RichTextBox3 ) and a (Textbox1)
